PROFILE SUMMARY

Passionate Full Stack Developer with 2 years of experience developing scalable applications using **Java**, **Spring Boot**, and **RESTful APIs**. Experienced in backend microservices and web development, with solid knowledge of **database management** and system design. Strong problem-solving skills and proven ability to collaborate with cross-functional teams to deliver reliable, high-performance, business-focused software solutions.

EDUCATION

Basavakalyan Engineering College, Karnataka
Basavakalyan PU College, Karnataka
Government High School, Chengta, Karnataka

B.E. in Computer Science – CGPA: 7.5 (2024)
12th – 68% (2020)
SSLC – 78% (2018)

PROFESSIONAL EXPERIENCE

HG Infotech, Bangalore, India
Full Stack Developer

Jun 2024 – Present

Project: [Fastays.com](https://fastays.com) – B2C Travel Booking Platform (Flights, Hotels, Tours, Buses)

- Developed scalable backend services using **Java**, **Spring Boot**, **MongoDB**, **Kafka**, and **Microservices**.
- Developed responsive and dynamic frontend modules using **React**, **Tailwind CSS**, **JavaScript**, and **REST API** integration.
- Built modular microservices for **user authentication**, **booking workflows**, and **payment processing**.
- Implemented an **API Gateway** to enhance inter-service communication, security, and performance.
- Optimized **MongoDB** queries for high availability and fast access in high-traffic booking systems.
- Integrated **third-party APIs** for real-time availability of flights, hotels, tours, and bus services.
- Deployed services on **AWS**, achieving **99.9% uptime** and seamless **auto-scaling** for thousands of users.

TECHNICAL SKILLS

- **Languages:** Java, TypeScript, SQL
- **Frontend:** Angular ,RxJS ,Angular CLI
- **Backend Frameworks:** Spring Boot, JUnit, Mockito
- **Architecture:** Microservices, REST APIs, Service Discovery (Consul)
- **Databases:** MySQL, MongoDB
- **Tools & Technologies:** Git, Postman, Swagger, AWS,Kafka

PROJECTS

Fastays (Travel Booking Platform) – Built a comprehensive travel booking system offering flights, buses, hotels, and tours under a unified interface. Implemented advanced flight booking options including one-way, round-trip, and multi-trip, integrated third-party APIs (TBO for flights/buses, DMC for tours), and developed booking, cancellation, refund, and payment gateway workflows. Focused on scalability, real-time availability, and smooth user experience across services.

Tech Stack: Java, Spring Boot, Microservices, MongoDB, Kafka, ReactJs,Swagger, Consul, TBO/DMC APIs
